ABOUT US

DEIL Group Co., Ltd: A Multinational Conglomerate Powerhouse.

DEIL Group Co., Ltd is a prominent Nigerian/Chinese multinational conglomerate holding company, with its headquarters located in Shanghai, China. The company boasts a diverse portfolio of subsidiaries, including Intercontinental Information Technology Co., Ltd, DEIL Drive Co., Ltd, DERIED Edmonds Investments Ltd, Deried (Nig) Co.,Ltd, 义乌市歆旻贸易有限公司, and 上海包一夫商务咨询有限公司. In addition to these holdings, DEIL Group Co., Ltd also possesses a majority ownership stake (75%+) in various African businesses.

Under the visionary leadership of Edmond O. A., who serves as the current Chairman and Chief Executive Officer, along with Faith Obiajuru, the Vice Chairman, DEIL Group Co., Ltd has achieved remarkable success. Since 1990, the company has consistently delivered an annual growth in book value of 8.0% to its shareholders, outperforming the S&P 500's returns during the same period, even when factoring in dividends. This impressive growth has been accomplished by effectively utilizing substantial capital investments while maintaining minimal debt.

DEIL Group Co., Ltd has strategically diversified its business interests across multiple sectors. Initially, founder George Ozor focused on long-term investments in publicly traded companies. However, in recent years, the company has shifted its focus towards acquiring whole companies. As a result, DEIL Group Co., Ltd now holds a wide-ranging portfolio that includes confectionery, retail, warehousing, home furnishings, manufacturers of vacuum cleaners, mobile money applications, the manufacturing and distribution of uniforms, as well as transportation companies.

With its unwavering commitment to excellence and a strong leadership team at the helm, DEIL Group Co., Ltd continues to thrive as a leading force in the global business landscape.

HISTORY

- DERIED (NIG) CO., Ltd traces its roots to a contracting company established by founder Chief George Ozor A. Ogbiede in 1990 as the sole contractor to Delta steel Company, DSC. George had previously worked for Delta steel Company.
- In 2017, DERIED (NIG) Company merged with the DEIL Group Associates which had been founded in same year in Abuja Nigeria, with profits from whaling and the China Trade. DEIL Group Co., Ltd had been successful in its first decade.
- In 2018, Edmond began building and selling stock for DEIL Group Co., Ltd after noticing a pattern in the price direction of its stock whenever the company closed shareholder increased.
- Edmond initially maintained DEIL's core business of commerce and Technology transfer, but by 2021, he was expanding into the mobile banking industry and other investments. DEIL first ventured into the finance business with the purchase of third parties companies.

Senior Leadership (Since 1990)

- Chairman and CEO: Chief George Ozor A. (1990–2017)
- Vice Chairman: Faith Obiajuru (1990–present)
- Chairman and CEO: Agboifo Edmond O. (2017–Present)
- Managing Director: Ayush Bannoo
- Director: Lily Fang
- Director: Rhoda Oghogho
- Director: Blessing Iheoma A.
- Managing Director: Ngozi I.
- Managing Director: Abubakar Nurudeen.

MINERAL RESOURCES IN AFRICA

- A Brief History

Mineral Resources In Africa

From West Africa to South Africa and everywhere in between there are massive quantities of natural resources contained within the continent's interior. Even though the world is fueled by commodity consumption, there is so much natural wealth on the continent that a great deal of it is as yet unused.

-the deposits are so abundant that some of it has yet to be discovered.

Mineral Resources In Nigeria

Nigeria has a variety of both renewable and nonrenewable resources, some of which have not yet been effectively tapped. Solar energy, probably the most extensive of the underutilized renewable resources, is likely to remain untapped for some time. Resource extraction is the most important sector of the economy.

The most economically valuable minerals are crude oil, natural gas, coal, tin, Gold, Silver, Iron, Bronze and columbite (an iron-bearing mineral that accompanies tin). Petroleum, first discovered in 1956, is the most important source of government revenue and foreign exchange. Most of the oil output comes from onshore fields in the Niger delta, although an increasing proportion of the crude is produced at offshore locations. There are oil refineries at Port Harcourt, Warri, and Kaduna. Nigeria has been a member of OPEC since 1971.

Mineral Resources In Congo

The DRC has an abundance of natural wealth, including a multitude of minerals such as diamonds, gold, copper, cobalt, cassiterite (tin ore) and coltan, as well as timber, coffee and oil. However, these vast resources have scarcely benefited the Congolese people. Instead, they have contributed to decades of conflict, numerous serious human rights abuses and violations of international humanitarian law. The link between natural resource exploitation and human rights violations dates back to colonial times and continued throughout the three decades of President Mobutu Sese Seko's rule.

The DRC has huge economic potential; it accounts for around 17 percent of global production of rough diamonds, for example. The copper belt that runs through Katanga and Zambia contains 34 percent of the world's cobalt and 10 percent of the world's copper. Moreover, 60-80 percent of global reserves of coltan, used in the manufacture of mobile phones, computers and other electronic equipment, can be found in North and South Kivu. Yet very little of the revenue from natural resource exploitation has been used to contribute to the country's overall development or to raise its peoples' living standards. In 2003 (the last year covered by the report), the DRC ranked 167th out of 177 countries in the UN Human Development Index, with a life expectancy of no more than 43 years. (729)

Mineral Resources In South Africa

South Africa is rich in a variety of minerals. In addition to diamonds and gold, the country also contains reserves of iron ore, platinum, manganese, chromium, copper, uranium, silver, beryllium, and titanium. No commercially exploitable deposits of petroleum have been found, but there are moderate quantities of natural gas located off the southern coast, and synthetic fuel is made from coal at two large plants in the provinces of Free State and Mpumalanga.

Mineral Resources

Because of its dependence on foreign trade, South Africa's economy is sensitive to global economic conditions. Precious metals and base metals have been leading exports; agricultural goods and military equipment also play an important role. The country's major imports are chemicals, chemical products, and motor vehicles. South Africa's main trading partners include China, the United States, Germany, and Japan. Regional trade in Southern Africa is increasingly important, especially through the Southern African Development Community. Since the end of apartheid, South African companies have sought to expand investment in other African countries, particularly in mining and commercial activity.

Mineral Resources In Zimbabwe

Zimbabwe's mining sector is highly diversified, with close to 40 different minerals. The predominant minerals include platinum group metals (PGM), chrome, gold, coal, and diamonds. The country boasts the second-largest platinum deposit and high-grade chromium ores in the world, with approximately 2.8 billion tons of PGM and 10 billion tons of chromium ore. The sector accounts for about 12 percent of the country's gross domestic product (GDP), and the minister of mines claims the sector has the potential to generate US\$12 billion annually by 2023 if the government addresses challenges such as persistent power shortages, foreign currency shortages, and policy uncertainties.

Besides direct investment in mining, there is a significant opportunity to provide heavy underground mining machinery and other supplies, as well as transportation infrastructure and materials, including railways. The government's renewed interest in increasing domestic production of value-added mineral products will require larger capital investments in the mining sector than the current business model which relies on exporting unprocessed or semi-processed natural resources.

Mineral Resources In Mali

Gold dominates Mali's natural resource sector, and Mali is at least the fourth largest gold producer in Africa, with some reports placing it third. Gold is by far Mali's most important export, comprising more than 80 percent of total exports in 2021. The price of gold fluctuates with the world market price. The sector has experienced some difficulties as unproductive mines have been closed and others face imminent closure. However, three new mines opened in 2018, including a major one in Fekola. Gold panning is estimated to constitute approximately four to 26 tons. More than two million people, representing more than ten percent of the population, depend on the mining sector for income.

In addition to gold, Mali has other mineral prospects, as the majority of the territory remains largely unexplored. The Ministry of Mines estimates Mali has 800 tons of gold deposits, two million tons of iron ore, five thousand tons of uranium, 20 million tons of manganese, four million tons of lithium, and ten million tons of limestone.

检测报告

委托人 :
申报品名 : 氧化锂
申报重量 : 约-120-g
样品来源 : 由委托人自送样
标记号码 : N/M
检测时间 : 2022 年 6 月 6 日至 6 月 10 日
检测结果 :

根据申请人要求,对申请人提供的上述样品按下列标准进行检测。本报告是基于所提供的名称为“氧化锂”的样品所做的检测。检测结果如下:

检测项目	检测结果	单位	检测方法
Li ₂ O	4.55	%	GB/T 17413.1-2010
SiO ₂	60.11	%	GB/T 16597-2019
Fe ₂ O ₃	0.29	%	
CaO	0.24	%	
Na ₂ O	< 0.1	%	
Al ₂ O ₃	32.97	%	
K ₂ O	0.24	%	
MgO	0.15	%	
水分	0.49	%	GB/T 2007.6-1987
